Extra layer of security required for Premium Billing log in

Thank you for using the Premium Billing system for your billing needs.

Effective March 26, when you access Premium Billing directly from the **Blue KC Claims/Premium Billing portal**, you will be prompted to set up an extra layer of security called multi-factor authentication (MFA). MFA requires you to verify your identity in more than one way when logging in.

Blue KC also recommends setting up recurring automatic payments, so you have one less bill to think about each month.

This user manual will assist you in setting up and using **MFA for Premium Billing**.

Please contact **816-395-2950** if you have questions.
